" We your viewers appointed for Road #542, wish to report as follows:-

" (1) That we viewed said road on March 19, 1925, and found that this road is needed as a public highway for entrance to the Hamilton Cemetery, and would also be serviceable as an outlet for several ranches;

"(3) That we recommend that this road be constructed and opened as a public highway provided, however, that all fencing be done and all right of way -- 40 feet in width -- be furnished by the signers of the petition without cost to Gallatin County.

Respectfully submitted,

(Signed) John A. Aakjer

Upon motion duly made and seconded the following viewers' report was approved:

Honorable Board of County Commissioners
Bozeman, Montana

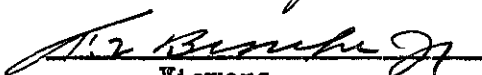

Gentlemen:

We, your viewers appointed for Road # 543, wish to report as follows:

- (1) That we viewed said road on April 3, 1925, and found that there now is a private road fenced where petitioners want road; that while it is only twenty-five feet in width, consider that sufficient as it will only directly benefit one family.
- (2) If accepted will mean the building of two bridges; one about eight feet and the other about twenty-five to thirty feet. The south end of said road is in a bog bottom, then comes up to quite a high railroad crossing. All of the above will entail quite an expenditure of money.
- (3) That we recommend said petition be not granted, but if parties interested desire to purchase lumber or culverts for crossing over Kelly Creek, that same be sold them at cost out of material which the County has on hand.

Respectfully submitted,

Viewers.

After considerable discussion it was decided that the County would pay him fifty cents per rod to build fence from the bridge in a northwesterly direction to a point now fenced by Wells and others, which he agreed to do. Mr. Werner also agreed to fence the balance of the road that had not been provided for at his own expense. Mr. Werner also asked permission to move the line of said fence about fifteen feet in order to avoid a swamp; Board allowed him permission to do so providing it did not interfere with the present grade. #

#

Minutes of previous meeting were read and approved.

#

Mr. Hardy of Wilsall, and Mr. Gross of Chicago, met the Board relative to a reduction of taxes on a reservoir constructed by their company near the Park County line; said reservoir being in Gallatin County but the land which it was supposed to irrigate being in Park County. They stated that this dam was not in use; that they had never been able to use it, and asked that the valuation be reduced to the value of the land until such time as they could make use of it for the purpose for which it was intended. In view of these facts the Board recommended to the County Assessor that the valuation of the dam be reduced from its present value of \$25,000.00 to \$10,000.00.

They inspected the Williams bridge on the Jefferson, and the work for the protection of the East bank that had been done by Supervisor Lane, and ordered him to reinforce the riprapping and place rock around the piers on the East side of the bridge. They also inspected roads in the Willow Creek district and laid out additional work for Supervisor Lane.

Upon motion made by Commissioner Aakjer and seconded by Commissioner Benepe above report was approved.

HON. BOARD OF COUNTY COMMISSIONERS,
GALLATIN COUNTY, MONTANA.

GENTLEMEN:--

We your viewers appointed for Road Petition #540 wish to report as follows:-- We viewed the route of said proposed road on April 28, 1925, and find the following conditions existing:--

- (1) that said road is necessary inasmuch as it would provide access to the main roads from several ranches;

- (3) that it is not certain as to whether all rights of way and fencing can be obtained without expense to Gallatin County;

We recommend that this road be constructed and opened to traffic provided all rights of way and fencing are given and constructed without cost to Gallatin County.

Respectfully Submitted,

#

#

Those present being Hon. G. W. Darlinton, Chairman, Hon. John H. Aakjer, and Hon. F. L. Benepe Jr., Commissioners, and J. H. Harris, County Clerk and Recorder, as Clerk to the Board.

#

#

The following proceedings were had and done, to-wit:--

#

#

Minutes of the previous meeting were read and approved.

#

#

Ike Alldritt met the Board relative to repairing New World Creek road. The Board offered to furnish powder, caps and fuse, and any other equipment necessary; agreed to write other interested in hauling out timber over this road and ask them whether or not they would assist in repairing same.

#

#

County Attorney Peterson made application to the Board for three weeks leave of absence from the state, leave to begin July 6. Upon motion made and duly seconded this leave was granted. Mr. Peterson stated that in his absence H.D. Bath and C. E. Carlson would handle the work of his office without any additional expense to the County. The Forest Department having made application to the County to turn over to them the abandoned road on the East side of the Gallatin river, between the new bridge at the Jack Smith ranch and the old Blanchard bridge, on motion made and duly seconded the road was turned over to them. Following is the communication received from them relative to the above and the Board's reply to same:

"County Commissioners,
Bozeman, Montana

Gentlemen:

You will recall that the Commissioners of Gallatin County turned over to the Forest Service for their unrestricted use the river bridge across the Gallatin east from the Blanchard residence in Sec. 33 T. 6 S. R. 4E., the old road right of way extending from the graveled road at the Smith ranch along the east side of the river crossing the bridge mentioned and again connecting with the new graveled road in front of the Blanchard residence was retained by the County under its original right of way status. This old road is of material benefit to the Forest Service and should not be closed since it affords an open passage way east of the river and makes directly accessible the Levenski Creek drainage basin.

During the past several weeks Mr. F. A. Blanchard who considers that the acreage in the old road right of way automatically reverted back to him has caused a considerable amount of inconvenience to tourists camping along this road by ordering them from the ground, and to the Franks Fur Farm by fencing the outlet of the old road as if it were his own property.

This office desires that the old right of way be kept open for the reasons above mentioned, and in addition, so that the strip of land may remain open to the public as a public camping ground. This useage of the land would not in any manner whatsoever interfere with Mr. Blanchard or his interests in the locality. It is, therefore, respectfully requested that the County Commissioners of Gallatin County assign to the Forest Service for their unrestricted use the entire right of way extending between the points as above mentioned. In so doing this office wishes to advise you that its motives in the use of the road will be of the highest order, and that arrangements will be made so that the area can be opened up and used and enjoyed by all who see fit to make use of it. Signs will be posted designating the area as a public camping ground in addition to its other usages by the Forest Service.

Very truly yours,

B. W. CLARK, Forest Supervisor

By C. B. SWILL, Acting.

"Mr. B. W. Clark, Forst Supervisor
Gallatin National Forest
Bozeman, Montana

Dear Sir:

Your letter of even date relative to the abandoned road on the east side of the Gallatin river between the Jack Smith and Blanchard bridges at hand. In reply will state that the County has no use for said road. We hereby turn said road over to your Department to make such use of as you see fit. It being expressly understood that the County is transferring only such right as they may legally have to said road, and henceforth will assume no responsibility for said road whatsoever."

Emmett Stucky met the Board and stated that the culvert which carried the irrigation water across the road at the Lyons ranch was too small and asked that a head-wall be put on so that water could go through same. Board inspected culvert and orderer Supervisor Lincoln to put head-wall at the lower end of same. Board inspected other work being done by Supervisor Lincoln in that vicinity.

Those present being Hon. G. W. Darlinton, Chairman, Hon. John H. Aakjer, and Hon. F. L. Benope Jr., Commissioners, and J. H. Harris, County Clerk and Recorder, as Clerk to the Board.

#

#

The following proceedings were had and done, to-wit:--

#

#

Minutes of the previous meeting were read and approved.

#

#

The Board answered correspondence pertaining to various matters.

#

#

Board inspected the work being done by the dragline on the Harry Smith road and found same progressing satisfactorily; also, work of gravel crushing and surfacing on Voluntary Improvement District # 7.

#

#

Board approved salary claims and signed warrants for same.

#

#

Mrs. Clyde Walker called the Board and stated that there was an excessive amount of water coming from the dragline ditch and going through her place and asked that investigation be made and the water turned off if possible. The Board inspected same and found that about forty inches of the water was coming from the drag line ditch and the balance from a slough just above the White ranch; that this would naturally come through her place even though the drag line ditch had ^{not} been dug.

#

#

Reed Russell reported the bridge about a quarter of a mile west of the Leverich school house in bad condition; Board investigated same and ordered Supervisor Hoadley to repair same.

" We, your viewers appointed for Road Petition # 545, wish to report as follows:

- (1) That we viewed the proposed route of said road on September 5, 1925;
- (2) That we find that a road on this location would save considerable distance for many people in going to and from the school, cheese factory, and their ranches;
- (3) That one twelve foot span wood bridge and one culvert for an irrigating ditch would be required, as well as a small amount of brush cutting, and fills across bottom land in two places, neither of which is of very great length;
- (4) That we recommend that said road be constructed and opened to traffic provided that all rights of way and fencing be furnished and constructed free of expense to Gallatin County, and that road be located on most feasible route as determined by survey.

Respectfully submitted,

John H. Askjer

" Honorable Board of County Commissioners
Gallatin County, Montana

Gentlemen:

We, your viewers, appointed for road petition # 546, wish to report as follows:- At the request of Mr. C. B. Robinson, we viewed the proposed location of this road on September 5th. while in the vicinity for the purpose of viewing Road #546, as Mr. Robinson stated on that date that he was going to file a petition covering the route designated in petition #546. We found the following conditions existing:-

- (1) The proposed route is a very feasible one;
- (2) The proposed new road would serve the territory much better than the present road, which would be vacated;
- (3) The construction of the new road could be accomplished at reasonable expense.

We wish to recommend:-

- (1) That provided all rights of way and fencing are furnished and constructed free of expense to Gallatin County, the road be constructed at some future time when funds are available for this purpose;
- (2) That right of way be 60 feet wide;
- (3) That survey be made as soon as possible so that Mr. Robinson can construct new fences on road line

" Respectfully submitted,

John H. Aakjer-Viewers.

County Commissioners' Office
Bozeman, Montana

The Honorable Board of County Commissioners met at the above named office on Tuesday the 1st day of December, A. D. 1925, at 9:00 o'clock A. M.

#

#

Those present were Hon. G. W. Darlington, Chairman, Hon. John H. Aakjer, and Hon. F. L. Benepe Jr., Commissioners, and J. H. Harris, County Clerk and Recorder, as Clerk to the Board.

#

#

The following proceedings were had and done, to-wit:--

#

#

Minutes of the previous meeting were read and approved.

#

#

The report of County Surveyor Waldorf relative to the head gate and pipeline placed by George D. Pease in the drag line ditch on the Fowler land was received, and on motion made and duly seconded same was adopted. Report reads as follows:

" Certain provisions of a resolution passed by your board on the 9th day of June, 1925, and recorded on page 67 of Book #16 of the Commissioners Journal, authorized Mr. Geo. D. Pease of Bozeman, Mont., to construct and maintain a pipe line connecting the county road drag line ditch near the Southwest Corner of Section 23, Township 2 South, Range 5 East, with an irrigation ditch in the adjacent field owned by Mr. Pease. The resolution further provided as follows:- "such pipe line and head-gates to be constructed under the supervision of the County Surveyor of Gallatin County", and "that the County Surveyor be, and he is hereby, instructed to supervise the installation of the said ditch or pipe line, and report to this board".

I have interpreted the above instructions to the County Surveyor to mean that the surveyor was expected to exercise his supervision only over such features of the construction of the head-gate and pipe line as might in the future prove a damage to the county road with particular reference to that clause in the aforementioned resolution reading as follows:- "Provided, however, that the said pipe line or ditch shall not interfere or damage the said road or road grade, or the proper drainage thereof". Accordingly I exercised no supervision over the materials used in, and the placing of, the concrete in the head-gate, or the laying of the pipe line, since the installation must be maintained by Mr. Pease, and its length of life therefore is not pertinent to the interests of Gallatin County. I did, however, specify that such details of the construction and location of said head-gate and pipe line as would affect the county road, should be performed in accordance with instructions issued by me, and wish to report as follows on the installation of these structures.

Mr. George D. Pease did, on or about the 7th day of July 1925, cause to be constructed a concrete dam with head-gate, and a pipe line leading from said dam to his ditch in the adjacent field, said dam being located immediately north of the South Line of said Section 23 and approximately 20 feet easterly from the Southwest Corner of said section. Said dam is approximately 12 feet in length, 4.5 feet in height, and 1 foot in thickness, and extends well into the side banks and bottom of the drag line ditch. An opening or gate 3 feet in width, is provided in the center of the dam, and extending from the bottom of the ditch to the top of the dam, said gate being constructed so that by means of boards placed therein the height of the water back of the dam can be regulated. A pipe line of 19 inch Armco corrugated iron pipe has been laid to connect the upstream face of the dam with the irrigation ditch in Mr. Pease's field adjacent to the east side of said drag line ditch, said pipe line having a fall exceeding one-half inch to the rod, and being so placed that water may thereby be diverted from the drag line ditch to the irrigation ditch.

" The gate in said dam is of ample size so that when desired the entire flow of the drag line ditch may be allowed to pass the dam. The pipe line is so located that when water is impounded to a height sufficient to completely cover the end of the pipe, the elevation of the impounded water surface is three feet below that of the top of the road grade. It is my opinion that the dam, gate, and pipe line, if maintained and operated properly with due regard to winter weather conditions, will not damage the road grade or interfere with the proper drainage of the roadbed."

Deer Lodge, Montana

Dear Sir:

Replying to your letter of November 17 relative to fencing of right-of-way East of Cardinal. We beg to state that we are today taking steps towards getting this fence relocated and will have same in good shape as soon as possible.

Your attention is called to the fact that your transmission line comes very near to the road grade at the point where Mr. Mott was injured. In a letter to our County Engineer, S. D. Waldorf, under date of August 6, 1924, your over-head maintenance foreman, F. L. Tavenner, states that he had measured the distance from the road grade to the high tension wire and found the same to be 16.5 feet. This we deem to close for the safety of the public traveling on the highway and respectfully call you attention to this fact.

" Mr. P. G. Poore
Maintenance Supt., State Highway Commission
Helena, Montana

Dear Sir:

Replying to your letter of December 17th., we beg to state that this Board is willing to co-operate in reshaping, resurfacing and stock piling projects # 44B and 82 D. With reference to Project #201 we do not believe that it is in great need of resurfacing at this time. This is the best piece of gravel surface that was constructed in Gallatin County under the old inch and a half specification and is still in very good condition. We would also be willing to co-operate in putting a heavy surface of shale on Project #177 if the same was deemed advisable by your Department. Owing to the isolated situation of Project #177 it would be very expensive to cover it with crushed gravel at this time: it is also reasonably certain that the Yellowstone Trail between Manhattan and Logan will be surfaced with gravel before many years and Project #177 would, of course, be included in this work.

Hoping that this arrangement will be satisfactory to your Department and the Bureau of Public Roads, we are,

Very truly yours,

G. W. DARLINGTON, Chairman

"We are of the opinion that the object of section 4 of article 12 of our Constitution was to relegate to the several counties the whole subject of taxes for county purposes, and that thereby the legislature is denied authority to impose any tax on the inhabitants of a county for county purposes. San Francisco v Inc Co 74 Cal. 113, 15 Pac. 380, 5 A, St. Rep. 425. In view of what has been said it is not necessary to give consideration to the uniformity requirement of the Constitution. Attempt being made by the act to levy a per capita tax in fixed amount, to be collected by the several counties for county purposes, we must hold it to be in excess of the legislative power and therefore void".

AND WHEREAS it is deemed and considered necessary and advisable that a poll tax or per capita tax be levied on every male inhabitant of the County of Gallatin over twenty-one and under sixty years of age, except paupers, insane persons and Indians not taxed, for the purpose of providing, in part, for the care and maintenance of the indigent sick, or otherwise dependent poor of the County;

#

#

Engineer Torgerson reported the estimate on the County's portion of the expense on Project #222 would be \$11,856.00; that if the county would put up the \$1956.00 in addition to the \$10,000.00 that they would make this a separate project. On motion made and duly seconded the Board agreed to make it two projects instead of one, and the following letter was written the State Highway Commission relative to same:

Mr. W.O. Whipps
Assistant Chief Engineer
State Highway Commission
Helena, Montana

Dear Sir:

After giving the matter due consideration, the Board feels that it would be economical and good policy to continue Federal Aid Project #222 to station 295 at the grade crossing on the N.P. instead of terminating same at station 245 as has been contemplated.

We would request that you make two grade projects; one extending from the Bozeman City limits to the Bear Creek bridge; the second, from Bear Creek bridge to station 295 at the grade crossing. The bridge to be put under separate contract, and all three contracts to be arranged at the Commission's convenience.

We would suggest that the grading on both projects be given to one contractor, as we believe this can be handled more economically than by giving it to two separate contractors."

Commissioner Aakjer reported that on July 25 about 8:00 P. M. he was notified that the C. S. Kenyon family had been injured by the collapsing of the bridge across Sour Dough just West of the Montana Flour Mills. Mr. Aakjer immediatly took steps to barricade same and place a red lantern on the site. Mr. Kenyon reported that his father had been badly shaken up and bruised.

On motion regularly made and carried the Board together with County Surveyor Waldorf inspected the bridge across Sour Dough just West of the Montana Flour Mills. An order having been received from the State Board of Equalization to cancel assessed against the Meadow Creek and Northwestern Improvement companies, Cou was instructed to cancel said assessments as per the following order from th

" To the Honorable Board of County Commissioners
Of Gallatin County, Montana

Gentlemen:

For the year 1923 the State Board of Equalization certified to your count taxed as "Net Proceeds of Mines" as follows:

Royalty received by the Northwestern Improvement Company from the Meadow \$390.49.

Royalty received by the Northwestern Improvement Company from Coulston, Eschel & Lasich, \$52.65
Opposite the first item above described taxes amounting to \$18.13 were extended by your county treasurer; and as to the second item taxes amounting to \$2.32 were extended.

A similar tax having been entered in Musselshell county, your petitioner brought suit to cancel that tax, on the theory that "Royalties" are not "Net Proceeds" and not taxable as such. The following letter was written David R. Smith, Helena, relative to fencing right-of-way:

" Your letter of December 9 received and must say that we were very much surprised at its contents. In your interview with our county surveyor, Mr. S. D. Waldorf, it was our understanding that it was distinctly understood between yourself and Mr. Waldorf that all the fencing required would be a fence along the lower, or west, side of the road where it crosses Section 15. Proceeding upon the terms of this agreement, part of the grading has been done on the road and the people of Clarkston are constructing the fence.

" Relative to the road crossing Section 23, we beg to advise that the road across this Section has been a legally used county road for many years. This road was established prior to 1908, and was surveyed and established as a county road on July 7, 1908. (I am referring to the present road leading from Logan to the corner of Section 15.

" The road leaving the Trident road and running in a northeasterly direction was also used as a public road for many years, but was established as a public road in September 1916 at the request of Mr. J. M. Malin, who was at that time owner of this property. The question of fences on either of these roads across Section 23 has never been considered at any time. They were well established roads long prior to the time of your acquiring title to this property.

" Again referring to your letter, we note that you state that this road will be of no use to you either in going to Trident or Logan. We confess we are unable to see how it is possible for you to go to Logan without using this road where it crosses Section 23.

" With reference to the policy of the County Commissioners of Lewis and Clark Co., we have nothing to say either in criticism or commendation. It has been our policy to require fences and right-of-way when establishing or changing roads other than government federal aid roads. It was distinctly understood that there was to be no charge for the right-of-way or fence other than has been specified in our former letter to you, and by the terms of your agreement with our county surveyor, and we most respectfully decline to consider any other arrangement. "

#

#

The following proceedings were had and done to wit:

#

#

A Special session was called as per order of April 27th for this day by Chairman Askjer all members present and concurring and waiving notice.

#

#

On motion made and carried the board to-gether with Fred Thieme Dis't engineer of the Forrest Dep't, and George Patten representing the Bozeman Chamber of Commerce went over that portion of the West Gallatin Road which the Forrest Dep't had contemplated re-constructing and hard surfacing. For the purpose of determining the best interest of the public that portion of the \$60,000.00 appropriated by the Forrest Dep't, should be used. And considered the question of dividing the construction under this \$60,000. appropriation into two projects, so as to surface the black flats on either side of Karst's and also the black flats near the mouth of the canyon, as the center section is through hard material, and in good condition. Mr Thieme stated that in his opinion it would be advisable to start at the upper end and commence to gravel near Jack Smith ranch and construct the road down the river. He stated this would complete approximately 8 miles of road. We found about six miles at the upper end of this stretch was thru the black flats and which got very muddy during wet weather. Also approximately 3 1/2 miles at the lower end of said stretch extended from the Forrest line to the mouth of Squaw Creek.

It was the opinion of the board together with Mr. Patten that if these two stretches approximately nine and a half miles could be hard surfaced that it would practically eliminate the worst stretches from Bozeman to the Park Line. The engineer estimated that \$8,000 per mile would be the minimum cost, that would not leave enough to construct more than a mile and a half near the mouth of the canyon, which would be too small a project to warrant a division.

It was apparant, therefore, that additional funds must be found. To meet the situation Mr. Thieme said that the District Forester will have available additional funds to the amount of \$9,000. which can be used when matched by a like amount by the county.

The board did not feel disposed to match this \$9,000 as the road program would not permit at this time. It was decided to take the matter up with the Chicago, Milwaukee & St. Paul Railway and the Northern Pacific Railway Companies, and asked that they give equal amount with Gallatin County and thus match the \$9,000 which was available from the Forrest department.

RULES AND REGULATIONS GOVERNING THE BOARD OF EQUALIZATION.

I.

The Board of county commissioners is the county board of equalization, and must meet on the third Monday of July in each year to examine the assessment book and equalize the assessment of property in the county. It must continue in session for that purpose from time to time until the business of equalization is disposed of, but not later than the second Monday in August.

No assessment as returned by the Assessor shall be lowered or raised or any reductions or additions thereto or changes therein made, except as provided by Sections 2113 & 2121 inclusive, of the Political Codes of Montana, 1921, and amendments thereto.

II.

No assessment shall then be reduced unless the party affected thereby or his agent makes and files with the Board a written application therefor verified by his oath, stating the particular items sought to be lowered or reduced and the facts upon which it is claimed such reduction should be made.

IV.

No assessment shall be lowered or reduction granted unless the person or the agent making the application attend and answer all questions pertinent to the inquiry relative thereto, and the Board has authority to subpoena such witness as it may deem in its

discretion proper and necessary.

V.

The assessor or his deputy shall be present at all sessions of the Board and aid and assist the board in all matters that may come before it.

VI.

The board of county commissioners must use the abstract and all other information it may gain from the records of the county clerk or elsewhere, in equalizing the assessment of the property of the county, and may require the assessor to enter upon the assessment-book any property which has not been assessed; and any assessment made as prescribed in this section has the same force and effect as if made by the assessor before the delivery of the assessment-book to the county clerk.

VII.

During the session of the board of county commissioners it may direct the assessor to assess any taxable property that has escaped assessment, or to add to the amount, number or quantity of property, when a false or incomplete list has been ordered, and to make and enter new assessments (at the same time canceling previous entries), when any assessment made by him is deemed by the board so incomplete as to render doubtful the collection of the tax; but the clerk must notify all persons interested, by letter deposited in the postoffice, postpaid, and addressed to the person interested, at least ten days before action is taken, of the day fixed when the matter will be investigated.

#

#

Board received various complaints from property owners relative to the assessed valuation of taxable property; same were taken under advisement.

The Honorable Board of County Commissioners met at the above named office in extra session on Tuesday the 19th day of July A. D. 1927 at nine o'clock A. M.

Minutes of the previous meeting were read and approved.

Viewers report on Road petition No. 555 was received; as follows.

To the Board of County Commissioners, Gallatin County, Montana.

We the undersigned viewers appointed for Road Petition Number 555 wish to report as follows:- (1) That we viewed the proposed road route on July 14, 1927. (2) That we found the following conditions existing:- (a) The portion of the proposed road leading from a point on Road #422 southwesterly across portions of Sections 1, 2, and 11, T2S R2E, a distance of approximately 1 1/2 miles to a point near the West 1/16 corner of the NW 1/4 of Section 11, would run down a steep hill at the eastern end of the location, and the best route for the road at this place could be determined only by survey; the balance of the road on this section would be of inexpensive construction; (b) the portion of the proposed road running south from the West 1/16 corner of Section 11 to a junction with road No. 524 on the South Line of Section 10, a distance of approximately 7/8 miles, has a private road already built approximately on the proposed route; this private road could be widened and used along part of the way, and the entire section could be constructed without great expense; (c) The road if established would furnish a valuable connecting link--along with Road #524-- between the Virginia City Road and Road #422 and would permit of mail service to many ranches. (3) We recommend that a survey be ordered to determine the most feasible route and the cost of construction, and that, provided the cost is not considered excessive, that the road be constructed in 1928, provided, however, that all rights of way and fencing required are furnished free of expense to Gallatin County.

Respectfully submitted,

John H. Aakjer, S. D. Waldorf.

EXAMINER'S NOTES

The following overdrafts existed in the District School Funds on the 31st of May, 1927:

District No. 33	\$1.53 Library Fund
District No. 38	6.15 Library Fund
District No. 68	.35 Library Fund
District No. 69	4.83 Library Fund

The bonds of the Madison Dyke and Drain District, and the bonds of Special Improvement Districts are not proper securities to cover deposits of public funds under the provisions of our present statutes.

The Petty Cash Fund should be reduced in the amount of \$15.00 to bring it within the authorized allowance.

County Fair and Redemption Fund warrants should be entered separately in the record of Warrants and Bonds issued instead of in lump sum, as has been the custom for several months.

Affidavits should be secured from Mr. Geo. M Lewis relative to the disposition of certain Special Road and Poor Tax receipts for the year 1924.

A number of the estates on deposit with the County Treasurer are subject to escheatment, and the matter should be taken up with the District Judge.

The Public Administrator does not enter all receipts and disbursements in his register, which would enable the examiner to make proper examination from his Register rather than from the books of the County Treasurer. The Public Administrator should be provided with a form of receipt book, from which he should give receipts for all moneys collected by him as Public Administrator. He should enter the receipts in his Register showing the date and number of the various receipts. He should also enter each warrant he issues in his Register showing the date, amount, and number. The Public Administrator should index his Register to afford an easy reference to the record of the various estates.

CLAIMS.

Claim No. 2797, Bozeman Welding and Machine Shop, \$8.00, does not show the year in which the service was rendered. Also as itemization shows the following: "Welding Bars." In itemizing claims it is necessary that details be shown as to the quantity of material supplied or the amount of service measured in hours, days, etc.

Claim No. 2843, Rufus C Selvage, \$42.50, does not show the year in which the service was performed.

Claim No. 2849, Frank Slaughter, \$120.00, is not sworn to.

Claim No. 2857, Commercial National Bank, \$37.50, is for rent, but does not state the rent of what particular office or building.

Claim No. 2860, Waite & Parkin, \$122.50, does not show the year in which the service was rendered.

We find quite a number of claims that are deficient as to showing the dates on which supplies or service was furnished.

Claim No. 3117, Fred B Williams, \$30.00, is for insurance on the Court House, but does not state the amount of the policy.

Claim No. 3326, C T Kirk, \$2.25, is for making axle shackles, but does not show the amount of material used nor the length of time employed.

Claim No. 3336, E J Noonan, \$29.40, is for taking testimony in the investigation of the death of Mrs. Josephine Walker, and does not show the number of folios in the transcript of testimony, nor the rate per folio.

Claim No. 2920, State Highway Commission, \$31.32, is not signed by the claimant.

Claim No. 3734, C M & St. P Ry Co., \$68.08, is not signed by the agent of the claimant.

Respectfully submitted,

Jay G Larson.

The Board informed them that they would go over this road with members of the School Board on August 30th.

Mr. Swim and Mr. Abbott of the local Forest Office met the Board and stated that the Forestry Department had approximately Twenty-five Thousand (\$25,000.00) Dollars available to be used on forest roads and the West Gallatin canyon road was given the preference, providing that the County would match said amount or any portion thereof on a 50:50 basis.

They were informed that the County was not in position to match any amount at this time unless we could get aid from other sources which we would try to do.

Floyd Davis and Fred Owens of Bridger Canyon presented a petition for a new County road leading from the ~~Belley Canyon~~ road in a southerly direction to the Davis and Owens ranches.
